The appeal of classical string instruments

Traditionally, high-quality string instruments have been considered luxury goods for centuries, reserved for only a select elite such as royalty and nobility. The Medicis, the Tsar of Russia and the Spanish Royal Family, to name just a few. However, Splint Invest aims to revolutionize this asset class, which was the preserve of banks and foundations for the last century, by introducing proportional investments that now allow you to own a share of these precious items. This model opens up new ways for you to participate in the classical string instrument market and enjoy the potential financial benefits of these valuable assets.

Historical and contemporary high-quality string instruments have shown to increase in value over time, making them an attractive investment option. Limited supply, increasing rarity and growing demand from musicians, collectors and enthusiasts all contribute to the potential for appreciation.

Limited production

An excellent violin maker produces on average only 5-10 instruments per year.

Constant growth

Historical data shows an average increase in value of 5.6% per year over a century.

Macdonald Stradivarius Viola

The value of this special violin is estimated at USD 45 million. Since the instrument, which dates back to 1719, is in excellent condition, it is one of the most expensive instruments in the world.

Market overview

Market size

The revenue in the String Instruments market is expected to reach USD 1.61 billion in 2024 and grow to approximately USD 2.07 billion by 2029, growing at a CAGR of 5.15%.

Important regions

USA, Italy, Germany and Asia

Special Stradivarius

An extraordinary instrument is the Messiah' Stradivarius violin (estimated value of $20 million), which was made by Antonio Stradivarius himself in 1716.

Cultural value

Beyond financial gains, string instruments are not only an investment but also a piece of cultural heritage.

Most important violin makers

Antonio Stradivari, Giuseppe Guarneri del Gesù, Carlo Bergonzi and Giovanni Battista Guadagnini

Important auction

The 'Lady Blunt' Stradivarius violin from 1721 was auctioned for $15.9 million in 2011.

Risk factors

Condition risk

The condition of a string instrument is crucial to its value. Damage, wear and tear or improper restoration can significantly reduce the value. Inadequate care or undetected damage can reduce the value of the instrument and cause additional costs for repairs.

Authenticity Risk

Counterfeit or inauthentic instruments can reduce the value of an investment. There is a risk of purchasing an instrument that does not meet the claimed standards or proof of origin.

Liquidity risk

The market for string instruments is often less liquid than other asset classes. Selling an instrument may take longer and may require specialized buyers or auctions. It may be difficult to sell the instrument quickly or at a desired price, which may result in delays or potential losses.

Invest with Splint Invest

Diversification

With Splint Invest you can easily diversify your portfolio and thus reduce your risk by investing in the 20 asset classes already available on the platform with numerous exciting investments.

Validated investment scenario

Every potential investment case goes through a comprehensive due diligence process and is reviewed by our experienced team.
