+16.0%

10.5% annualised performance

The final Splint price after exit fees, stands at a solid €57.97.
This translates to a net realised return of 16.0% within 1.5 years.

Rationale for exiting the investment opportunity:

 This investment opportunity was exited in March 2025 after 1 year and 6 months with a realized net profit of 16.0%, resulting in an annualized realized net profit of 10.5%.

Successful Exit of Our Silver Investment!

 The early exit was made with a strong annualized net return of 10.5%. For comparison, the annual appreciation of silver averaged 7.6% over the past 10 years, while the S&P 500 achieved an annualized return of 14.2% over the same period. This above-average silver performance demonstrates that the precious metal can offer attractive investment opportunities even in a stock-driven market.

Why an Early Exit?

The decision was not only driven by the above-average performance but also by the current geopolitical situation and the uncertainty regarding future silver prices.

Recent developments have brought significant uncertainties to the markets, including silver. In particular, tariffs imposed by U.S. President Donald Trump on imports from Canada, Mexico, and China have intensified trade conflicts.

These measures have led to increased volatility in commodity prices, including precious metals like silver. To secure the realized growth and avoid potential market volatility, we decided on an early divestment.

Expert Knowledge as a Success Factor

Our silver investment was curated by Philoro, a leading expert in precious metals. Through the careful selection of the entry timing, an above-average appreciation in value was achieved.

Silver bars, 3 x 15 kg, 999.0

Details of the Exit Decision

-  Invested Asset: 3x 15 kg silver bars
-  Purchase Price (30.08.2023): €36,450
-  Holding Period: 1.5 years
-  Selling Price (04.03.2025): €42,729
-  Net Return: 16.0% (after fees)
-  Annualized Net Return: 10.5%

Comparison with the Original Expectation:

In the initial investment case, we projected an annualized net return of 8.2% for the balanced scenario and 9.6% for the ambitious scenario. With an actual annualized return of 10.3%, the ambitious scenario was exceeded, confirming both the strength of the investment and the right market decision for an early exit.

Conclusion

Silver has proven to be an attractive and solid alternative to stocks. The targeted entry price, high market demand, and the expertise of our precious metals partner enabled this above-average exit.

Splint Invest continues to seek attractive commodity and precious metal investments to offer our investors the best opportunities for above-average returns.
