Stability

In 2023, the Artprice100 index recorded an average yearly increase in profitability of 4.2% for art investments.

Over the last two decades, art has proven to be a more lucrative investment choice in comparison to assets like the S&P 500 and the FTSE 100. The lack of liquidity in artworks, making them difficult to convert into cash quickly, is beneficial for assets that maintain stable values and demonstrate little correlation with fluctuations in the stock market.
