Factsheet

Splint Invest

LEGO Classic Cars (150 sets)

Invest in nostalgia and precision—these LEGO Icons sets celebrate two legendary American cars, offering timeless design, collectibility, and strong financial upside.

3 Reasons to Invest

1. **Return Potential** 📈: An investment of 500 EUR is projected to be worth approximately 801 EUR in 5 years.
2. **Cost-to-Return Ratio** ⚖️: After deducting 2.5% in annual total costs (including exit fees), your net return could reach 9.9% per year.
3. **Timeless Classics with Strong Growth Potential** 🚀: The LEGO Chevrolet Camaro Z/28 and Corvette C1 sets combine cultural nostalgia, exceptional craftsmanship, and rarity. As retired or soon-to-retire collectibles, they are poised for significant appreciation, with projected annual returns of 9.9%-10.9% CAGR over the next five years. Their appeal to car enthusiasts and LEGO collectors ensures strong demand,

making them a standout, low-risk investment opportunity in the thriving alternative asset market.

Asset Details

Details	Information
Set number	10304 / 10321
Name	LEGO Icons - Chevrolet Camaro Z28 / LEGO Icons - Corvette

Price per set	134 / 119
Market value	139 / 135
Asset ID	6bd641c1-ba46-4c74-893f-3e2b0567cea1
Total asset value in EUR	21,550
Purchase price in EUR	19,750
Platform fee in EUR	800
Storage and insurance in EUR	1,000
Number of Splints	431

Investment Case

Valuation Summary 📝 To ensure the competitiveness of the investment, we conducted a thorough verification of the purchase price by analyzing recent transactions and current market values on the market. Our analysis confirmed that the price offered, inclusive of all associated fees, is still highly competitive. To build up the investment case, we used the historical performance data of these models. For our conservative scenario, we assumed the value of the Lego sets would grow at the rate of Swiss inflation, reflecting a defensive approach. In the balanced scenario, we assume a 100% probability of realizing a 11.1% (CAGR 1 year for both sets) annual return for the next 5 years. Finally, in the ambitious scenario, we assume a 100% probability of realizing a 12.3% (CAGR 1 year of model 10304) annual return for the next 5 years.

Exit Options at Maturity 🚪 We will manage the exit strategy on behalf of our investors, ensuring the best possible outcome based on market conditions at the time. Depending on the value of the models and the prevailing market situation, we can either sell the sets privately to a wholeseller or to individual collectors. Both options are carefully considered, and we will choose the one that maximizes the return for our investors.

Why Invest in This Category? 🧱 Investing in LEGO sets offers strong potential for returns due to their limited production runs, high collectibility, and consistent demand. Many LEGO sets, especially themed or limited-edition releases, appreciate in value after they are discontinued, sometimes significantly. LEGO appeals to a wide range of buyers, from collectors to casual enthusiasts, ensuring a steady secondary market. Additionally, LEGO sets hold value well over time and often outpace more traditional investments in terms of percentage growth. This makes them an attractive, low-risk option for investors seeking both short-term and long-term returns.

Why Invest in This Asset? 💎 The LEGO Chevrolet Camaro Z/28 1969 and LEGO Corvette C1 sets present a compelling investment opportunity, combining nostalgia, craftsmanship, and strong historical performance. These two LEGO Icons sets pay homage to iconic American muscle cars, appealing to both car enthusiasts and LEGO collectors alike. The Camaro Z/28 (2022) features an intricate 1,456-piece build with impressive details, including a functional V8 engine, working steering, and customizable design options, making it highly desirable among collectors. As this set approaches retirement in most markets, its rarity and demand are poised to drive significant value appreciation.

The LEGO Corvette C1 (2023), commemorating the Corvette's 70th anniversary, has already retired, signaling the potential for near-term price growth. With 1,210 pieces, it recreates the elegance of the 1961 Corvette, offering intricate details such as a spinning radiator fan, working tie-rod steering, and versatile styling with hard- or open-top options. Both sets combine excellent design, cultural significance, and exclusivity, which are key factors for long-term appreciation.

With annual returns estimated at 9.9%-10.9% CAGR over the next five years, these models offer an attractive investment with limited downside risk. Their retirement status, collectibility, and enduring popularity within the LEGO and automotive communities make them standout assets for portfolio diversification.

Context in Time ⏳ The LEGO Camaro Z/28 (2022) and Corvette C1 (2023) sets capture a moment when vintage cars continue to influence pop culture, blending nostalgia with innovative craftsmanship. Released during a surge in demand for LEGO Icons collectibles and classic car tributes, these models reflect a growing market for items that bridge generations and collector categories.

Conclusion 🎯 The LEGO Camaro Z/28 and Corvette C1 sets offer a unique blend of nostalgia, craftsmanship, and investment potential. With competitive pricing, proven historical growth, and limited availability, they represent a low-risk, high-reward opportunity. Their enduring appeal to collectors and strong projected returns make them standout additions to a diversified portfolio.

Projection

The sets offer high return potential. The expected annual return ranges between 1.2% and 10.9%, depending on market conditions.

Here's the projected value of a Splint at maturity:
