Valuation Summary 📝 To ensure the competitiveness of the investment, we conducted a thorough verification of the purchase price by analyzing recent transactions and current market values on the secondary sport card market. Our analysis confirmed that the price offered, inclusive of all associated fees, is still highly competitive. To estimate the potential ROI, we used the historical performance data of the CardLadder Wembanyama card index. For our conservative scenario, we assumed the value of the card would grow at the rate of Swiss inflation, reflecting a defensive approach. In the balanced scenario, we calculated the average annual growth rate of the CardLadder Wembanyama card index over the past year. As this is the first patch card release of Wembanyama, we took 40% of the average price increase of 2024 Panini Instant WNBA Draft Blue Viper Catlin Clark Rookie Auto 1/1 card and the 2022 Panini Instant FIFA WC Qatar Black Lionel Messi Auto DNA 1/1 card as the basis for the ambitious scenario.

Exit Options at Maturity 📅 We will manage the exit strategy on behalf of our investors, ensuring the best possible outcome based on market conditions at the time. Depending on the value of the card and the prevailing market situation, we can either sell the card privately to a collector or take it to auction. Both options are carefully considered, and we will choose the one that maximizes the return for our investors.
