Investment Case

Valuation Summary  To ensure the competitiveness of the investment, we conducted a thorough verification of the purchase price by analyzing recent transactions and current market values on the secondary sneaker market. Our analysis confirmed that the price offered, inclusive of all associated fees, is highly competitive. We used the historical performance data of these models. For our conservative scenario, we assumed the value of the sneaker would grow at the rate of Swiss inflation, reflecting a defensive approach. In the balanced scenario, we calculated 80% of the average annual growth rate of these models since release. Finally, in the ambitious scenario, we calculated 100% of the average annual growth rate of these models since release.

Exit Options at Maturity  We will manage the exit strategy on behalf of our investors, ensuring the best possible outcome based on market conditions at the time. Depending on the value of the models and the prevailing market situation, we can either sell the sneakers privately to a collector or take it to auction. Both options are carefully considered, and we will choose the one that maximizes the return for our investors.
