LEGO, Star Wars UCS Bundle II, 30 sets each

The LEGO Star Wars UCS Bundle II combines one already-retired set with two nearing retirement, setting the stage for the highly anticipated "retirement pop" in value. As these iconic, limited-edition collectibles become increasingly scarce, they offer investors a rare chance to capitalize on the rising demand and appreciation in the secondary market.

3 Reasons to Invest

1. **Return Potential**📈: An investment of 500 EUR could reach an estimated value of 744 EUR in 5 years.
2. **Cost-to-Return Ratio**⚖️: After deducting 2.6% in annual total costs (including exit fees), your net return could reach 8.3% per year.
3. **Own a Piece of Star Wars History** 🌟**:** These LEGO Star Wars sets are more than collectibles—they're masterpieces beloved by fans worldwide. With limited production and one set already retired, their value lies in their exclusivity and

connection to iconic moments. As they become harder to find, their rarity and emotional significance make them treasures worth owning.

Asset Details

Details	Information
Set number	75341 / 75308 / 75355

Price per set	EUR: 191 / 211 / 173
Market value	EUR: 194 / 213 / 179
Asset ID	127170b5-2347-4918-a7d7-4792416baecb
Total asset value in EUR	19,000
Purchase price in EUR	17,300
Platform fee in EUR	700
Storage and insurance in EUR	1,000
Number of Splints	380

Investment Case

Valuation Summary 📝 To ensure the competitiveness of the investment, we conducted a thorough verification of the purchase price by analyzing recent transactions and current market values on the market. Our analysis confirmed that the price offered, inclusive of all associated fees, is still highly competitive. To build up the investment case, we used the historical performance data of these models. For our conservative scenario, we assumed the value of the LEGO sets would grow at the rate of Swiss inflation, reflecting a defensive approach. In the balanced scenario, we assume a 100% probability of realizing a 10.77% annual return for the next 5 years (CAGR - 4 years of the LEGO Star Wars The Death Star Set that retired in 2020). Finally, in the ambitious scenario, we assume a 100% probability of realizing an 18.0% annual return for the next 5 years (CAGR - 2 years of the LEGO Star Wars Imperial Star Destroyer set that retired in 2022).

Exit Options at Maturity 🚪 We will manage the exit strategy on behalf of our investors, ensuring the best possible outcome based on market conditions at the time. Depending on the value of the models and the prevailing market situation, we can either sell the sets privately to a wholeseller or to individual collectors. Both options are carefully considered, and we will choose the one that maximizes the return for our investors.

Why Invest in This Category? 🧱 Investing in LEGO sets offers strong potential for returns due to their limited production runs, high collectibility, and consistent demand. Many LEGO sets, especially themed or limited-edition releases, appreciate in value after they are discontinued, sometimes significantly. LEGO appeals to a wide range of buyers, from collectors to casual enthusiasts, ensuring a steady secondary market. Additionally, LEGO sets hold value well over time and often outpace more traditional investments in terms of percentage growth. This makes them an attractive, low-risk option for investors seeking both short-term and long-term returns.

Why Invest in This Asset? 💎 The LEGO Star Wars Bundle II brings together three exceptional models that are both masterpieces of design and investment-grade collectibles. Each set, from Luke Skywalker's Landspeeder (75341) to R2-D2 (75308) and

the X-wing Starfighter (75355), represents the pinnacle of LEGO craftsmanship, with incredible attention to detail and faithful recreations of Star Wars' most iconic moments. What sets these models apart is their imminent retirement (EOL), making them highly desirable for collectors and investors alike. Historically, LEGO Star Wars Ultimate Collector Series (UCS) sets have demonstrated consistent value appreciation post-retirement, often increasing by 20-50% within the first two years as supply dwindles and demand rises among collectors. In addition to their investment potential, these sets are beloved by fans, tapping into the emotional connection and cultural significance of the Star Wars franchise. Whether it's the sleek design of the X-wing Starfighter, the charm of R2-D2's intricate mechanisms, or the nostalgic appeal of Luke Skywalker's Landspeeder, each piece resonates with a global audience. This bundle is not just an investment in tangible assets but a way to align passion with profit, offering an opportunity to be part of something iconic while enjoying long-term financial rewards.

Context in Time ⏳ 2024 and 2025 mark the final production years for the LEGO Star Wars Bundle II sets. With the Star Wars franchise continuing to capture imaginations through new series and films, interest in nostalgic, high-quality memorabilia remains strong. These retirement years position the sets as rare opportunities to invest before they exit production, ensuring scarcity in the secondary market—a driving factor for long-term value appreciation.

Conclusion 🎯 The LEGO Star Wars Bundle II presents a rare opportunity to own limited-edition, highly collectible sets that are beloved by fans and poised for value appreciation post-retirement. Backed by thorough market analysis and historical performance data, this offering combines cultural significance with strong financial potential, ensuring a competitive and rewarding investment.

Projection

The sets offer high return potential. The expected annual return ranges between 1.2% and 15.3%, depending on market conditions.

Here's the projected value of a Splint at maturity:
