Valuation Summary 📊 To ensure the competitiveness of the investment, we conducted a thorough verification of the purchase price by analyzing recent transactions and current market values on the secondary sneaker market. Our analysis confirmed that the price offered, inclusive of all associated fees, is highly competitive. We used the historical performance data of comparable Supreme models (Louis Vuitton x Supreme Christopher Backpack and Keepall bags). For our conservative scenario, we assumed the value of the set would grow at the rate of Swiss inflation, reflecting a defensive approach. In the balanced scenario, we calculated 70% of the average annual growth rate of these models since release. Finally, in the ambitious scenario, we calculated 100% of the average annual growth rate of these models since release. The offered model is 18% below current market offerings for deadstock versions.

Exit Options at Maturity 📅 We will manage the exit strategy on behalf of our investors, ensuring the best possible outcome based on market conditions at the time. Depending on the value of the models and the prevailing market situation, we can either sell the luggage set privately to a collector or take it to auction. Both options are carefully considered, and we will choose the one that maximizes the return for our investors.
